-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over US patent #5,999,191 (Frank et al).

- As for claims 1, 6, 11: Frank et al teach a computer implemented method and corresponding system for adjusting transparency of displayable objects within a graphical interface, comprising the steps/means for adjusting a transparency of a particular z-order level window in a stack of windows (figure 8). The transparency level is adjusted responsive to detected position of the sliding bar button 262 (9:6-43). Frank et al fail to clearly teach that the transparency is controlled by a scroll wheel. However, Official notice is taken that implementation of scroll wheel as input device is well known in the art (see US patents 6,523,079, 6,489,950, 6,396,482, 6,392,640). It would have been obvious to one of skill in the art, at the time the invention was made, to combine the well known implementation of scroll wheel input device to Frank et al for controlling the transparency level. Motivation of the combining is for the advantage of having a compact, easy to control, one hand operated supplemental

input means. In light of the combining, the transparency level is adjusted responsive to detected position of the scroll wheel.

- As for claims 2, 7, 12: Window 260 is a top level window (fig. 8).
- As for claims 3, 8, 13: The display order of the windows can be rotated (10:25-32).
- As for claims 4, 9, 14: The window at a particular z-order level can be selected at least by a graphical selection (9:65 – 10:24).
- As for claims 5, 10, 15: The sliding button 262 is adjusted corresponding to the adjustment of transparency.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ba Huynh whose telephone number is (703) 305-9794 ((571) 272-4138 after 10/12/04). The examiner can normally be reached on Mon - Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Heather Herndon can be reached on (703) 308-5186. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
